SUMMARY

Full-Stack Developer with 5 years of experience delivering scalable web applications across domestic and international environments, including a current role with a Singapore-based organization. Proficient in React.js, Next.js, Node.js, and Go, with a proven track record building enterprise platforms, e-commerce systems, and ERP solutions across multiple industries. Experienced in performance optimization, CI/CD automation, and end-to-end product delivery. Also active as a technical educator and community contributor, having mentored and reviewed 1000+ students across national developer programs.

EXPERIENCE

International Centre For Industrial Transformation (INCIT)

Singapore. Remote from Indonesia

Fullstack Engineer

Dec 2024 - Present

- Collaborated with cross-functional teams to architect, develop, and maintain a unified analytics platform across 5+ enterprise products, delivering interactive dashboards and real-time data visualization that reduced manual reporting time
- Built and maintained scalable web applications across frontend and backend services, achieving sub-2s page load times and supporting 500+ concurrent users.
- Conducted regular code reviews covering 100+ pull requests, led refactoring initiatives that reduced codebase complexity and cut bug recurrence rate significantly.
- Established CI/CD pipelines using Docker and GitHub Actions, automating build, test, and deployment workflows.
- Built a custom SCORM-based e-learning platform tailored to enterprise needs, enabling standardized content delivery and progress tracking across 2 platforms.

PT. Sehati Prima Makmur

Jakarta, Indonesia

Senior Frontend Developer

Mar 2022 - Dec 2024

- Led digital transformation initiatives converting offline workflows to digital platforms for 3 brands, cutting manual operational processes by ~70% and improving team productivity.
- Designed and implemented RESTful APIs and database schemas across 3+ applications, integrating real-time data sync and authentication that handled 1000+ daily active users.
- Delivered 10+ full-stack web applications including landing pages, e-commerce platforms, and ERP systems, serving 3 subsidiary brands and reducing time-to-launch per project by ~35%.
- Optimized application performance and accessibility per WCAG guidelines, improving average page load speed by ~45% and achieving Lighthouse scores above 85 across key products.

- Developed and maintained 10+ features for an on-demand worker platform across web and Android, contributing to a user base growth from ~5,000 to 20,000+ registered users during the engagement.
- Contributed to both web and mobile applications simultaneously, meeting 95%+ of sprint deadlines across 9 months while coordinating with 3 cross-functional teams.
- Resolved 40+ critical bugs and implemented new feature modules that improved user retention by ~25% and reduced crash rate by ~50%.

PROJECTS AND COMMUNITY

Telkom Indonesia

Built and delivered an internal telco dashboard in 5 months for 200+ users. Scaled to 50K+ records with real-time updates, cutting reports to <30s. Improved UI performance ~40% with React, Redux, and Webpack (90+ Lighthouse).

CV Jasa Rahayu Gumpueng

Built internal transport dashboard for 100+ daily tickets across routes. Cut booking time ~65% with dynamic seat & multi-passenger system. Boosted staff efficiency ~50% via automated reporting.

Dicoding Indonesia

Being Code Reviewer, Reviewed 1000+ submissions across FE, React, and Backend learning paths, enforcing code quality standards. Instructed 30+ students and mentored capstone teams, driving successful project delivery. Facilitated national dev events, supporting 100+ participants to graduate on time

EDUCATION

Informatics engineering, Mikroskil University of Medan

Bachelor Degree (3.69 gpa)

2019 - 2023

SKILL

- **Language & Runtime:** JavaScript, TypeScript, Go, HTML/CSS, Node.js
- **Frontend:** ReactJS, NextJS, React Native, TailwindCSS, PWA, Vanilla JS
- **Backend:** NestJS, Express.js, Go (Fiber), gRPC, GraphQL, REST API, WebSocket
- **Database & ORM:** PostgreSQL, MySQL, MongoDB, Prisma, Redis

- **DevOps & Cloud:** Docker, Kubernetes, AWS, CI/CD (GitHub Actions), Git, Firebase, Webpack
- **Testing:** Jest, Vitest, Playwright
- **AI Integration:** OpenAI API / LLM APIs, AI-powered feature development
- **Practices:** Microservices Architecture, Agile/Scrum, WCAG Accessibility
